Dear Mrs. Milette

After inspection of the facility at 730 North Main Street in Waterbury, CT. We are preparing to take oil samples from the Transformers stored at the site. Our client Waterbury Realty LLC. Purchased these buildings and has been renovating each building as the tenants left Unfortunately one of the tenants had a fire and destroyed the building where these transformers were installed decades ago. At this time we have been directed to rectify all problems at this site regarding any USEPA or CTDEP perceived violations.

I appreciate your assistance with the questions we had and will keep you advised as to the progress and copies of our findings.

James Solano

Project supervisor
